

CNC Machine Setup/Operator

Pointe Precision, Inc., a growing company that supplies custom machined metal components primarily for the aerospace and medical industries, is seeking to fill multiple Level 3 Machine Operator positions. Qualified candidates will have 6-8 years of experience in a CNC machine shop environment and will be efficient at performing the following job duties:

- Simple to complex setup of CNC machines
- Prove out first part runs
- Inspection of product using precision measuring equipment including CMM operation
- Interpret tolerances and dimensional requirements using advanced knowledge of mathematics and GD&T
- Run short and medium length production jobs producing close tolerance metal components
- Monitor dimensional and visual quality on a piece by piece basis
- Change tooling when needed and adjust for offsets to maintain dimensional conformance
- Work in a team environment with good communication skills and display a positive attitude
- Train and coach Level 1 & 2 operators
- Overall knowledge of sound machine shop practices
- Maintain a clean and orderly work environment
- Perform daily machine maintenance

We offer an exceptional benefit package including Health, Dental & Prescription coverage, paid Vacation and Holidays, 401k plan and Life & Disability Insurance coverage. We are located in Plover WI. in a very clean air conditioned facility with steady overtime opportunities.
